

We got Dallas 13 years ago and he has been the best dog ever! Loving, cuddly, sweet, a member of the family. He got a lump on his paw a few years ago and it has been growing, especially this last year. The needle biopsy could not determine if it was cancer. The mass started bleeding constantly a couple weeks ago and he has to have it removed. Possibly might have to have his toe amputated also. We are so grateful to Paws 4 A Cure for their help and for all the people who donate!
