

My baby Isabel was hit by a car on 10/13/13. During our dinner party she got out and we tried to stop her but within 10 sec she was hit. It broke all of our hearts.

We took her to the ER in Brandon, FL. We are new here from Oklahoma and very little money as my only income is SSI. So they couldn't help her because I could not afford it. They told me to go to Animal Coalition and I took her there. She had a hard time breathing and hard to walk and in lots of pain, lots of scrapes, cuts and bruises. The X-Ray showed her tail is completely broke off which has caused lots of swelling. She needs surgery if not they said she could die. They gave her pain medication and antibiotics. She's in so much pain, she poops and pee on herself.

She's the best dog, I know everyone says this but when my husband left me she was 6 months old. I was crying and feeling so hurt of him leaving. Isabel climbed on me laid her head on my chest and licked my tears away. She is the one who stayed by my side to love me during my hurt. Now I want to help her but I'm low income with no extra money. Thank you Paws 4 A Cure for helping her. They say she will back to her old self after the surgery.
