

Hello, my name is Lido, I am a 7 month Old English Bulldog and I love you. How do I know that, because I love everyone! I was born with a heart murmur, now I have an enlarged heart. My mommy and daddy were crying and seemed scared until they took me to the University of Minnesota Doggie Cardiologist. I have a very good prognosis of having a good life if I can get a special procedure for my Pulmonary Valve Stenosis called a pulmonary valve balloon stent. If I do not have this procedure I may live up to a year but it costs over three thousand dollars!!

I love going to the dog park, playing with my sister (a lab/golden pup), following my mom everywhere, trying to protect my toys from the vacuum and those chopped up hot dogs I get for training treats. My mom and dad spent a lot of money just taking me to different veterinarians and trying to figure out why I am having a hard time lately. The good news is they were really happy when the vet said some nice people might help me out. And ya know what? It happened!!! Paws 4 A Cure donated \$500.00 which put my surgery into action. I am now scheduled for surgery and looking forward to a long, healthy happy life with my family and prospective new friends!!

Thank you Paws 4 A Cure!!!

Sincerely,  
Lido
