

Penny had a rough beginning at the few years of life. She was adopted from a shelter, Penny thought she had a family that was short lived. Penny and I met at an elderly apartment building. We instantly knew we belonged together. Penny is a beautiful beagle mix girl, gentle and loving to all. Penny and I have been through a lot together. Penny has had seizures in the past. Her first cancer surgery was done in the vet office by a surgeon. Then came news more cancer, NEVOG in Waltham was recommended. Everyone there has been so helpful, giving direction to loving agencies, funds were obtained, surgery began. Now Penny had chemo and now radiation is needed. I was at a loss words and couldn't express my sadness. I felt like my world was over. Still everyone at NEVOG did not turn me and Penny away. When we walked in for our first treatment Corie sad did you get the news I said no. She said you got the GRANT. Corie was jumping up and down, I cried happy tears of joy Thank you so much, this is the best news. I thank you from all of us. Paws 4 A Cure is a blessing. I realize someday I will have to make a choice and thank for all the happiness and love we had together. Penny is very happy, no side effects from treatments. Love Penny
